

ESSENTIALLY BETTER

Ravello

Safe and comfortable transport chairs

Ravello

The chair range for safe transfer

When patients or residents cannot move about independently, getting to other rooms can often be a challenge. What is needed is a transport chair which offers a high level of safety and comfort and which does not require a great deal of effort from staff. A homelike appearance contributes to preserving the dignity of patients and residents. The transport chairs in the Ravello range perfectly satisfy all these requirements. Due to the large variety of models and practical accessories, they can be adapted to meet individual wishes and requirements.

ESSENTIALLY BETTER Model facts

- Armrests can be lowered to provide a comfortable sitting position
- Optional side rests provide additional support
- Headrest, fitted as standard, offers enhanced safety
- Concealed care items on the back of the chair
- Optionally equipped with easy to attach table (accessory)

Ravello cure

- The lower leg rest and the fixed footrest lift simultaneously to follow backrest adjustments

Ravello sano

- 2 directional castors
- Retractable footrest for easier access

Ravello sano-s

- 4 directional castors
- Separately attached footrest can be retracted for better access

Ravello plus-s

- Seat height adjustable between 51 and 80 cm using a lever mechanism

▲ The length-adjustable footrest moves with the mattress base when this is adjusted and provides firm support for the user's feet.

Ravello curo

Reliable support

If a patient or resident needs to be transported lying down, the backrest on the Ravello curo can easily be reclined to an angle of 43°. The Ravello curo has large, stable front disc wheels and directional castors with brakes at the rear. This makes the chair effortless to manoeuvre.

If the Ravello sano and sano-s are swivelled into the lying position, only the lower leg rest moves at the same time.

ESSENTIALLY BETTER The “s” factor

The “s” on the Ravello sano-s and Ravello plus-s models stands for “simple movement”. These models have 4 swivel castors with a diameter of 125 mm or 150 mm. These chairs are particularly easy to steer and can be manoeuvred in even the tightest of spaces without collisions. This protects patients and residents and keeps the chair and room furnishings safe from damage.

The height can be adjusted between 51 and 80 cm using a simple lever mechanism on both sides.

Ravello sano and sano-s

Easy to get in and out of

The Ravello sano differs from the curo model in that the footrest is mounted separately. The advantage of this design is the freer access it allows to the seat, which is particularly beneficial for people with walking difficulties. The footrest can be retracted if the patient or resident wishes to sit down or get up. This allows

people in need of care to walk right up to the chair’s seat and to feel firm ground beneath their feet when they stand up. This model is available as the sano with 2 directional castors, and as the variant sano-s with 4 directional castors.

- ▼ The footrest can be fully retracted and extended using a simple mechanism.

The footrest is fixed underneath the chair as an independent element. ▶

Ravello plus-s

For demanding care

If residents or patients have difficulty staying on their feet for longer than a moment, care staff can also quickly reach their physical limits. The Ravello plus-s helps in many practical ways in this situation. Thanks to the seat’s height adjustment and tilting

options, the chair helps users in any position and makes it considerably easier to get in and out. Users feel the seat surface as soon as they start to sit down and do not have the feeling they are losing their footing.

- ▼ The seat can be tilted forward to facilitate standing up and sitting down.

- ▼ Adjustable armrests and a folding footrest assure unhindered access.

- ▼ The 4 swivel castors are particularly large and make them easy to manoeuvre.

▲ The optional tray can simply be attached to the armrests.

▲ The lowerable armrests allow unobstructed access from the front and the side.

▲ If the user requires additional support whilst sitting, there is a special headrest with lateral support available.

▲ There is an optional mounting bracket for drainage bags.

▲ Infusion stands can be inserted on both sides using the sleeves supplied as standard.

Equipment and options

Useful additions

A substantial standard model and innovative accessories transform the Ravello into a transport chair which people are happy to spend time in. The Ravello also allows medical aids to be attached securely and discreetly. All Ravello models are available in a radiant cobalt blue. The upholstery is resistant to standard disinfectants used in hospitals (concentration according to the list of the German Society for Hygiene and Microbiology, DGHM).

▲ Optional side rests promote an upright sitting position.

Custodians of values Shapers of the future

STIEGELMEYERGROUP

Custodians of values

Our company was founded in Herford in 1900 and is still a family-run enterprise today. Respect and a sense of responsibility towards our customers, employees and partners form the basis for our day-to-day work. Based on these values and our many years of experience, we offer our customers all over the world high-quality products, solutions and services to meet the needs of the care and healthcare sectors.

Shapers of the future

In order to cope with rapid changes in the care and healthcare sectors, we develop all our products ourselves. Creating innovations and visions of what care will be like in future are the goals we pursue. We maintain regular contact with our customers in order to support them in their daily tasks. Implementing tomorrow's trends today is a successful tradition of ours.

Our expertise

- Hospital
- Nursing home
- Homecare
- Lifestyle beds
- Furniture systems
- Service

The Stieglmeyer-Group is your international partner for hospitals and care facilities and, with the Burmeier brand, also for home care. We support our customers with practical products, solutions and services, which we constantly develop further.

- Founded in 1900 and still family-run today
- Employs 1,100 members of staff worldwide
- Production of all core products in our own factories
- Product development and manufacture in Germany
- Services, training and process optimisation at the customer's site
- International certification and export to more than 60 countries
- Sales companies in Belgium, Finland, France, the Netherlands, Poland and South Africa
